Download Manager V1.0 Release Notes

New Features and Changes

- An option to enable/disable the use of the server filename has been added to the Options dialog.
- The help contents displays relevant websites, the user guide, and current known issues.

See the user guide for more information on these new features and changes.

Bug Fixes

The following items have been fixed and are contained in this release.

- In the instance where a download error occurs for an item, the error message can be displayed by clicking on the status for that item.
